Release Note Reference:	3.0.9
Release Date:	25th February 2025
Downtime:	No disruption to service is expected for this release
Product:	Medi-Map R3.0.9

Bug Fixes

Type	Reference	Description	Users who benefit
Bug	**MEDI-685**	**OST - Variable dose missing repeats when dispensed in dispensing software** **Resolution** Prescriptions with OST medications have now repeats being sent correctly to the dispensing software.	**NZ**
Bug	**MEDI-687**	**OST - Titration dose quantity needs to be the initial dose of titration not final dose** **Resolution** Initial titration dose, when scanned into prescription software, is showing the initial dose of the titration.	**NZ**
Bug	**MMCD-4**	**Edit on chart removes pending stop** **Resolution** On a charted line with a pending stop (a stop on a future date), when the line is edited, the pending stop remains the same on the medication.	**ALL**
Bug	**MMCD-3**	**The correct facility IDs are not being displayed correctly in e-scripts** **Resolution** Prescriber name and address are displaying correctly in e-scripts.	**NZ**

Bug	MMCD-20	**Stop OST Medication should cancel the OST e-script** **Resolution** When stopping an OST medication in the patient chart, e-script with the current medication gets cancelled.	NZ
Bug	MMCD - 33	**OST - Date on individual script should be date it is generated - not backdated** **Resolution** OST e-scripts are having date generated as today (the day it was generated) regardless of start date on script.	NZ
Bug	MMCD-62	**OST – Scripts aren't being cancelled when cancel e-script button is pressed** **Resolution** OST scripts if not scanned by dispensing software, can be cancelled if cancel button is pressed.	NZ
Bug	MMTC-55	**If a patient is edited without changing their facility area, Notes record a new change under facility history** **Resolution** When editing medication chart profile details no change will be recorded to the facility or area unless an actual change has taken place.	All
